

Financier Denies Japan Is Seeking War With States

Birmingham Banker, Back From Trip to Orient, Says Empire Not in Condition to Endure Conflict.

Birmingham, Ala., Sept. 17.—I am surprised that there is any serious talk of a conflict between America and Japan, Nippon is hardly in a condition to finance a war, and there are certainly no indications in that country of preparation for movement for any trouble," said Morris Adler, local financier, who has just returned from a 10 weeks' tour of the Sunrise Kingdom.

"Japan is giving much thought to developing her manufacturing industries and general business. There is plenty of money in circulation, and I was told that the banks carried a considerable balance. The merchants, however, complained some of depreciation of merchandise.

"The country could hardly raise money for a war at this time. Europe is impoverished and, so, could not advance any. As we know, money is a vital factor when a country embarks with the war god.

"I heard much talk of Japan's withdrawing her troops from Siberia, but this, of course, was not official."

Mr. Adler visited Yokohama, Tokio and Kyoto, in Japan, and several larger cities of China. So far as could be observed, feeling over the country is not hostile to Americans as has been reported, he said.

Lively Fall and Winter Loom in Lincoln as Bryan-Zehring Battle Nears Fever Heat

Capital City About to Make First Try-Out of Recall Method.

Lincoln, Sept. 17.—(Special).—For the first time in its history, the city of Lincoln is about to "try out" the recall method of getting rid of an elected city official.

Also—perhaps for the first time in the history of the recall—the recall plan is linked with a program of legislation, proposed by the initiative, which if successful means that the citizens at large virtually take over the fixing of public policy instead of leaving that to the city council.

Elsewhere men have been recalled from office for flagrant misdeeds or incompetency. Elsewhere also citizens have initiated particular measures which the city council would not do.

But the Lincolnites backing the present movement propose to put a whole program of legislation on the city ordinance book and to recall two of the five city commissioners for the avowed purpose of making room for two others who will, in their opinion, be in sympathy with this new program.

A certain American statesman once defined the initiative, referendum and recall as a "gun behind the door," to be used only in case of emergency. If the present reform movement in Lincoln goes as far as an election, as now seems likely, the gun will be out in the front parlor, loaded to the muzzle and mounted on a revolving base which permits its being trained on a good deal of the neighborhood.

The main-spring of the present activity is—those who know Lincoln city politics need but one guess—Charles W. Bryan, brother of William J. of Miami, Florida, and for years the despair and torment of those Lincolnites who love peace and quiet, who hate turmoil and disorder.

Always Wear Vests. Brother Charley loves turmoil as some others hate it; the music he most enjoys is not made by a Victrola but by the campaign speakers who are attacking the "vested interests" (the interests always wear vests, for some reason), and no speaker can do quite as good a job as this.

Randall of the Minnesota state department will have charge of the primary work with the teachers.

Prof. Richard Ernest, Drake university, will have charge of the art and drawing lessons during the institute. Prof. Reese Solomon of Fremont public schools will supervise the music throughout the three days. Addresses by Miss Atwood of the extension department, and Miss Johnston, Red Cross nurse, will be features of the meetings. All schools in the county will be closed.

Dry Weather in Dakota Brings Out Rattlesnakes

Hot Springs, S. D., Sept. 17.—(Special).—Owing to the dry season of the year, rattlesnakes have been growing numerous during the last few weeks. Molzahn of this city killed a large snake with seven rattles. While on the porch at the back of the house he heard the rattle, and when a light was brought it was found that the snake was only about two feet from him.

F.C. ZEHRING

violated the spirit of the law by making Zehring mayor instead of Bryan. The Wage-Earners. Bryan and his supporters claim to have enrolled the wage-earners, the women's clubs and retired farmers in their camp. On the other side are business men and many others, including some who declare a belief that when a man is defeated for an office to which he aspires, he should keep still and give the victor a chance to which goes on the jobs a chance to which goes on the jobs a lively fall and winter in Lincoln even if the legislature is not in session.

Sea Captains Say New Current Wrecked Alaska

Los Angeles, Sept. 17.—Did a new ocean current, driving in from mid-ocean, carry the steamships Alaska and San Jose against Pacific coast rocks in two recent shipping disasters in Pacific waters? Theories to this effect have been expressed here by two experienced and old-time sea captains. One, Capt. P. L. Abrahamson, considered the world's veteran sailor, has captained ships in the Pacific ocean for 45 years.

During his entire 72 years of life on the sea the captain, who is 81, has steered his vessels through, across and around many of the great currents of the world's largest bodies of water. In his belief a new current has set in from mid-ocean and is driving against the Pacific coast, and when those in charge of the San Jose and the Alaska thought they were a sufficient distance from the shore to what was going on, Brother Charley was saying they were correct, but when this new current struck them the ships were without their knowledge carried against the shore.

A production of "King Henry V" was given recently at Stratford-on-Avon by a cast made up entirely of women, the first time women have undertaken a Shakespearean production at Shakespeare's birthplace.

Fix the Teeth

Every day we hear of someone who has been cured of a serious ailment by having the teeth properly attended to. This fact is recognized by the medical world. We do not mean that every ailment is attributable to bad teeth, nor do we claim that all diseases can be cured by having dental work done, but we do claim that by having your teeth and mouth put into healthy condition you will eliminate the source of many serious troubles.

Dr. Burhorn's Chiropractic Health Service

Chiropractic is today recognized as the greatest advance in the art of healing. We are getting health results in ninety per cent of the cases that come to our offices. Most of the cases we get are men and women who have tried every other method before they came to us. Now if we restore health in 90 per cent of these chronic cases, what do you suppose our health results would be in acute cases? My answer is: "They would never become chronic."
