Machines Take Place of Ice Box

Homes and Stores Eliminating Bother and Expense Of Refrigerators.

More and more homes and stores are being equipped with small ice machines to obviate the bother and expense of ice refrigerators. One of the most notable of these ma-chines is the "Armstrong," handled in Omaha by the Trapp-Gohr-Dono-van company, 1125-27-29 North Twenty-second street.

A portable, self-contained ice machine is built for stores, small hotels and homes of good size. This unit is installed with great ease.

The company here also maintains a department for the overhauling of all kinds of ice and power plants. It has also a foundry where the best of gray iron castings are produced. Plattner Denies Interest

When the stock was put up for sale by the government, I bought all their right and interest for over \$9,000 to help save my interests. I agreed that if they would allow these assets to remain in their buildings for a given term they could have the privilege of redeeming within that time, and I am not interested in any way, shape or form with any member of the Great Western Commercial Body company, nor have I ever been, except as far as their liability to me was concerned."
