Delegation to Disarmament Conference Determined to Do Utmost to Get Results.

By The Associated Press. Victoria, B. C., Oct. 36.-The Japanese delegation to the Washington conference arrived here filled with determination, according to its spokesman, to do everything

within reason to accomplish results. Japan has no aggressive program, nor will it spring any disagree-able surprises at the conference, the correspondent of The Associated Press was assured repeatedly during the momentous voyage across the Pacific when a furious storm seemed conspiring to prevent the party from

the delegation, in after dinner speeches during the trip, made it clear that Japan considers a naval understanding the great issue before the conference.

To Sound Atmosphere.

The correspondent gathered the impression that Japan goes to Wash- Wireless Expert Says Southern ington with what might be called a program of accommodation and opportunism. Its respresentatives will first of all, sound the atmosphere of the deliberations and present the cause of Japan as opportunity presents. Japan, he was assured, would ot propose dismantling of Amerifenses of the colonial possessions of Japan in that ocean, but Japan's basic principle is set forth authoritatively as heing its desire to maintain a navy sufficiently strong to gag any naval force that any power might be able to send to the waters of the far east.

This may develop as an image.

Japan apparently does not believe boundary line without passports over that the nawal bases at the Philippines and Guam are strong enough to handle the entire American fleet.

Omaha Produce

Furnished by State of Nebraska, department of agriculture, bureau of markets and marketing:

Weekly Summary.

Weekly Summary.

POULTRY.

The poultry market took a slight turn this week and prices on live springs and heas showed an advance of 1c to 2c per pound the last of the week. This advance is due to the strength shown in eastern markets, and sise to a falling off of receipts here. Buyers are paying 1se to 25c per pound for live springs and 11 to 25c per pound for heas, depending upon size and quality. Other poultry remains unchanged. The demand for poultry is good but not much more than enough poultry is coming in than will supply the local demand. Prices on dressed poultry remained unchanged to only slightly higher.

EGGS.

remained unchanged to only silently higher.

EGGS.

The egg market took a jump of le to 2c per pound on fresh eggs the middle of this week, with buyers paying 45c to 47c per dozen for extra select eggs, and selling at 47c to 56c wholesale. Under grades range correspondingly higher from prices quoted the first of the week. Fresh eggs are extremely hard to get at any price and a great many storage eggs are being sold at prices ranging from 26c to 36c per dozen wholesale. There is quite a demand for storage stock from country points to supply their local trade.

BUTTER.

DOINTER.

Creamery butter took a drop of 2c per pound this week in Omaha, although the eastern markets remained firm. Creamery prints are quoted at 45c per pound to city retail dealers the last of the week. Country butter remained unchanged as the amount of this butter coming in is hardly enough to materially affect the market.

Weekly Failures

Business fallures for the week ending October 27 number 470, which compares with 285 last week, 219 in the like week of 1890, 104 in 1819, 129 in 1918 and 235 in 1917.

Financial

The New york Eimes.

tober, which means that the problem of the next few months hangs on the capacity of the railroads to continue their drastic economies and on the question of the recovery in traffic gradual expansion of general trade.

gradual expansion of general trade.

Loans Higher.

You will financial attention has been so closely converged on the railways and the threatened strike, not much has been heard or said of the course of things. In the money market. What has been happening there, however, has been rather in open market have come down only tellowly since the New York reserve bank lowered its discount rates in open market have come down only tellowly since the New York reserve bank lowered its discount rate from 5½ per cent to 5 per cent on September 22. Time money last week was only about ¼ of 1 and the time of that reduction, and merchants paper Lardy reduced that much. In Loans of both classes, still, is fact, bring a higher rate on Wall street than in the federal reserve.

But Wall street loans do not always maturin activities are immediately ahead and the larger trend of events points to very decided revision of conditions in the money market after the large December settlements have been conspleted. If this readjustment at the "turn of the year" pursues the line of past experience, it is reasonable not only to expect, in 21921, a much lover general money market exceptions and in due course, equality distinct reduction of the interest rate charged on new loans floated for first-tents ecurlities and in due course, equality distinct reduction of the interest rate charged on new loans floated for first-tents ecurities and in due course, equality distinct reduction of the interest rate charged on new loans floated for first-tents ecurities and in due course, equality distinct reduction of the interest rate charged on new loans floated for first-tents ecurities and in due course, equality distinct reduction of the interest rate charged on new loans floated for first-tents ecurities and in due course, equality and the large process of the past week testify an unwitted by the heart of the past week testify an unwitted by to this tendence of this process. Loans Higher.

charged on new loans floated for firstclass foreign governments and home companies.

Two incidents of the past week testify
so unmistakably to this tendency of events
that they supersede all indications of hesitation on the day to day money market.
One of these incidents, naturally, was the
further rise in reserve ratio of the entire
federal reserve system, making a gain
of 1% per cent during October, as against
a decline of nearly 1 per cent in October,
1920, and 2 per cent in 1913. The other
incident, even more emphatic in its indication of what experienced financiers
expect, was last week's reduction of the
interest rate on short term government
certificates by the treasury which came
down to 4% per cent, the lowest rate
since 1919 and comparing with 6 per
cent a year ago, which were instantly and
largely over subscribed. This is one unmistakable forecast of the outlook for
next year's markets.

The market's discovery that Germany is
at present meeting in goods and not in
cash, the built of its accruing payments on
reparations account did not greatly help
the value of German currency last week.
There was no particular reason why it
should have helped it, so long as the government at Berlin continues to pour out
new paper marks at the nonfifal rate of
\$190,000,000 per week. The arrangement
for paying the reparations debt "in kind"
was altogether wise. It is advantageous
for all parties concerned and bids fair to
solve the tangled problem of the burden
on Germany. But insefar as the value of
the mark is affected by the amount continually added to Germany's irredeemable
paper, it makes no vital difference
whether the newly issued currency is

Bonds and Notes

The New York, Oct. 30.—It would hardly be in line with the facts to say that the calling off of the rail-situation, for there was never good reason to expect any other end to the past fornight's episode than the collapse of the brotherhood demonstration. The strike order was a blundering piece of business, in which the unions themselves never had any heart. That it may have been provoked by the exceedingly maladroit way in which the railway managers conducted their program of publicity regarding further reduction in wages is possible, but that the brotherhood order would evenualtly fall flat.

The present status of the railway situation, therefore, is precisely the same as it was in the middle of October, which means that the problem of the pext few months hangs on the the protein goves are following quotations are furnished.
