#### Readjustment in Copper Industry Making Progress

Sales for Year Likely to Exceed 1.100,000,000 Pounds -Cotton and Oil Returning To Normal Conditions.

#### By HOLLAND.

The Wall Street Journal has published an estimate of the total sales of copper in the first 10 months of the present year. These sales were in excess, according to this estimate, of 850,000,000 pounds. Should the sales in November and December amount approximately to those of October, which were 140,000,000 pounds, then the total sales for 12 months, will be a little over months will be a little over 1,100,000,000 pounds. A somewhat enforced coincidence between the copper sales measured in pounds and sales of state, county and munieipal bonds this year is suggested by the fact that the sale of these bonds measured in dollars is almost exactly equal to the estimated sale

of copper measured in pounds. Were it not for depression and the accumulation of very large surplus stocks of copper the sales this year should have been not far from 1,50,000,000 pounds. This copper situation should be considered in association with the situation in oil and cotton. All three show a convincing tendency toward perfect readjustment from which will follow normal conditions and then increased prosperity.

Conditions in South improve.

Conditions in South Improve.

The cotton situation as it was in the als summer changed in such sudden and yen spectacular manner as to be sure o make this change one of the traditions. I indicated readjustment not exactly in he cotton growing industry but in cotton nanufacturing and in the world's demand, that improved financial conditions in he south wonderfully and this improvement is already reflected in other parts of the country.

ment is already reflected in other parts of the country.

Soon after this change in the cotton situation came almost over night, another reverse action altogether favorable took place in the oil industry. That had been greatly depressed. It was necessary to reduce wages and in all many thousand operatives were laid off. Then, no one can tell exactly why or how, the favorable reverse began. There was an increase in the price of Pannsylvania crude oil and soon after another increase. Some of the leaders in the oil industry ventured to say that the corner had been turned. Readjustment had begun. The industry was approaching normal and healthful conditions. The increase in price of crude oil was no more than the working out of the law of supply and demand.

Readjustment Underway.

Readjustment Underway.

Therefore it is now possible to report that readjustment in three of our important industries has begun and is continuing. It has involved reduction of wages considerably below the large wage payments which were made in war days and were continued until recently. This means increased employment, in many cases very large increase, and consequent large production together with a reasonable stabilization of prices.

A chart which was published a day or two ago by the Wall Street Journal makes visible demonstration of the change in the oil situation. It shows that the situation has improved since summer. It also shows that from January 1 to July 1 of this year the oil situation was very unfavorable. Of course when the price of Pennsylvania crude oil dropped from \$5.10 to \$2.25 and when Mideontinent fell from \$2.50 to \$1 no other calculation was needed to prove the extent of the depression.

Until about August of this year the

New York Cotton.

New York. Nov. 15.—Pressure increased in today's cotton market after an early upturn, and prices dipped 20 to 22 points under last night's close in 'be afternoon trading, but the day's third and final swing upward, in the last hour, carried the general list back a bit above the level of Monday.

There was continued improvement in the first reaction the market went back to a level of 18 to 22 points at the opening. In the first reaction the market went back to a level of 18 to 22 points at the opening. In the first reaction the market went back to a level of 18 to 22 points at the opening. In the first reaction the market went back to a level of 18 to 22 points at the opening. In the first reaction the market went back to a level of 18 to 22 points and the final prices were from Wall street longs and the south moreased near midday and the list went back to the level of last night's close.

Shorts were active buyers in the addance near the close and the final prices were 2 to 19 points net higher.

By Alexander Dana Noyes
Chiese Tribune-Omaha Bee Leased Wire.
New York, Nov. 15.—The course of events showed pretty plainly that the financial markets are not at present in the mood to be greatly influenced by an event like the armament conference. An irregular recovery did indeed, occur on the stock exchange, but it was only partially sustained and the market closed in great irregularity. Foreign exchange, whose response to the plan of reduced army and navy programs would be natural enough, advanced a fraction further in today's carly market—the London rate going to 3.97—but all the early gain was lost in the later hours.

It might be said, perhaps, that the incidents of this week's markets up to date have been mainly interesting as a study in financial psychology.

It might be said, perhaps, that the incidents of this week's markets up to date have been mainly interesting as a study in financial psychology.

It might be said, perhaps, that the incidents of this week's markets up to date have been mainly interesting as a study in financial psychology.

The practical question is, however, what light they throw on the actual tendency of those markets.

### On Charge of Selling Stolen Securities

New York, Nov. 15. - Bert R. Chapman, an automobile salesman of Boston, was arrested today as he was sailing for Europe on the Aquitania, charged with disposing of securities which were part of the loot of a mail truck holdup in Los Angeles, March 3. The arrest was made by California postoffice inspec-

Securities valued at \$10,000, alleged to be part of the loot from the Los Augeles holdup, were traced to him, the inspectors said. Half were bonds of the Chicago, Burling-ton and Quincy railroad and half foreign securities. The latter, it was added, were recovered, while the sale of the former through a Boston concern drew suspicion to Chapman. Details of the evidence against Chapman were withheld, but the inspectors said they expected to prove he was the man who disposed of the railroad bonds and attempted to sell the foreign securities. He will be arraigned tomorrow, charged with violation of Section 194 of the penal
