# Mexican Problem Still Far From Being Adjusted

Insistence of Hughes on Treaty of Amity and Commerce Well Founded as Events Have Shown.

By HOLLAND.

In May of this year, the secretary of state, Judge Hughes had been it authority at the State department only two months. But among the first of the importnt matters which was called to his attention was the situation in Mexico. He became thoroughly informed respecting that situation and as a result made his first diplomatic move by proposing to the Obregon government that it enter into a treaty of amity and commerce with the United States, in which Mexico would bind herself to protect life and property in accordance with the established principles of iternational law.

The secretary of state especially emphasized the necessity of an agreement that article 27 of the constitution should not be interpreted as retroactive in its application to oil, mining and other property of Americans and other foreigners, which had been legally acquired under laws of Mexico, as those were prior to May I, Reached the Hospital. He knew that a treaty be-comes the supreme law of the land and cannot be changed, and he knew well the peculiar diplomacy of Mexico as well as the influence of the German propaganda. Oil Not Only Question.

Oil Not Only Queestion.

Secretary Hughes also knows that the oil question is not the only one pending between the United States and Mexico. It may be the most conspicuous but is not the only important one. It is one of many which are involved in the German-inspired bolshevists constitution of 1917. All these might be answered satisfactory were the United States and Mexico to draw up and to ratify a treaty of amily and commerce based upon the obligations of international law.

Then Dr. George Frederic Kunz, an authority on the history of precious stones, went to the Louvre, where a problem today as it was last May, when Secretary Hughes demanded of Mexico stones, went to the Louvre, where it necklace was deposited, and situation where perfect projection to life and property could be maintained. There appears to be little hope that formal amicable relations between the United States and Mexico can soon be established, because Secretary Hughes will not depart from his original purpose of securing a tresty of amity and commerce prior to this government's recognition of Mexico, while on the other hand there is little hope that Obreson will yield to the secretary of state, so that a treaty may be written and ratified. Therefore, it looks as though a period of watchful waiting will characterize the relations between the lack of relations. If there were an any period of watchful waiting will characterize the relations between the lack of relations. If there were a lack of relations if there were a lack of relations with Mexico would increase enormously and mexico would be all the better prepared to meet its long delayed international financial obligations.

"And you know, dear, I hate mysteries—especially about you."

"But we go to the theater," said "Cane's in the way at a theater."

"And then when we go to church-" "Always fallin over it in church," said Jack. So Jack went off to town to his

"What happened to what?" he re-turned blankly. "Your cane?"

He looked annoyed. "I-er-I left it."
"But where?" He fidgeted uneasily.
"Aw, never mind," he said a little fretfully, "I'll get it."
