1. New Union Passenger Station.

2. Continued improvement of the Nebraska Highways, including the pave-ment with a Brick Surface of Main Thoroughfares leading into Omaha.

3. A short, low-rate Waterway from the Corn Belt to the Atlantic Ocean. 4. Home Rule Charter for Omaha, with

Are We Governed Too Much?

City Manager form of Government.

A great hullabaloo is heard about the regula-

tions and restrictions laid on the people of Nebraska, and the hardship and expense entailed any advantage in possessing it, the middle west by the law-enforcing machinery. Let us look into the matter.

In the good old days it was not an uncommon thing to run across a bushel measure that and we expect to deal with them as equals, citiheld only a little over three pecks. Many a "pound" package was disposed of the contents of which weighed only thirteen ounces. Pint And, as The Bee already has stated, there is no measures were found that held but three gills, and gallons were correspondingly short. Counter scales had nice packages of lead foil under the pan, and all sorts of subterfuges were worked in this fashion. Spices were found to consist largely of adulterants, such as ground cocoanut shells masquerading as pepper, and even so common and cheap an article of food as table salt was vitiated by a cheaper substance. Sugar contained starch and terra alba, and so it went through all the list.

Farmers were victimized by sharpers who unloaded diseased animals on them, or through fraudulent claims of high breeding. Nebraska was a dumping ground for all sorts of inferior or deleterious stuff, and the people suffered and during the war. rebelled. Housewives clamored for protection against unscrupulous and dishonest dealers, Mussulman control of the three holy cities, farmers rose up against the frauds practiced on them, and rules and regulations were made to control the dealings between man and man, the law compelling honesty as far as possible. Unfortunately, no law is self-enforcing. Nebraskans over Palestine, Syria, Smyrna and Armenia. deliberately voted in favor of prohibition, and then as deliberately set about to nullify the law ing a great effort to enlist casual sympathy for they had created. Boards and inspectors are not only necessary, but are kept constantly employed in trying to protect the people.

If it is desirable to go back to the dear old times, when every form of cheating was practiced and the swindlers prospered, all that is needed is the enactment of an omnibus measure to repeal all the laws that are designed to protect the public against fraud, malpractice and deceit, and restore the harsh rule of "caveat emptor"-let the buyer beware. Short of that, there must be machinery to enforce the law. If we are governed too much, it is our own fault.

Politics in the Farm Conference.

While Governor Parker of Louisiana is praising President Harding and Secretary Wallace for abstaining from politics in selecting delegates to the farm conference now in progress at Washington, Delegate Wannamaker of South Carolina is doing his utmost to give the gathering a partisan bias. This astute and perspicacious individual, who hails from a section of the country where politics as such do not exist, sees in achieved great things while pursuing a personal the conference a clever scheme for breaking regime best described by a single word-simdown the influence of the farm bloc in congress. His disclosure is timely, and now that he has almost rigorous in its simplicity. His diet was warned not only his codelegates and the members of congress concerned, but the country and world as well, we may expect to see the nefarious machinations of Warren G. Harding certain laymen, and with it all he had the brought to naught. It is pitiful, though, to see strength for a vast amount of work. men, picked as representative of their communities and as having at heart the true interest of of its frequent reiteration in the review of the the entire country, commit themselves to such lives of notable men. Men great in scholarship, pettiness. The connection between the farm bloc and the farmer conference is too far- cess not by spectacular means for the most part fetched. Nothing the president has said or done; and certainly not by excesses of pleasure. A simeither when a senator or since he has been presi- ple life has been the solid foundation for steady dent, warrants ascribing to him any ulterior motive in his effort to restore prosperity to the farm. He is as patriotic and devoted to the country he serves as anyone else in the country, and he knows that no class can permanently prosper at the expense of another. It is share spending more than is needed for an economical and share alike, and when depression hits the farmer, it hits everybody. However, it is not unsafe to assume that Mr. Wannamaker is a democrat, and as such tinctured with that peculiar quality that leads to suspicion of anything a republican president may or may not do.

Make the Streets Safe.

"I propose to make the streets of Omaha safe women," said a judge of the district court, sentencing a culprit to prison. The prisoner had been found guilty of beating a woman on the streets, and the judge gave him sixty days to think it over, the last five on bread and water. Such administration of justice may build up in the minds of degenerates a wholesome dread of getting caught, and so be efficacious in establishing safety on the streets for women. But the streets should be as secure for men, and a little more of the same sort of treatment may have the effect of removing some of the danger that now exists. The menace of the footpad, the robber who does not hesitate to shoot or club his victim, is recognized, and is too common a part of our city life these days. Omaha is not

peculiar in this regard, for every city in the land suffers from the epidemic of crimes of violence against person and property. Whatever the cause, the remedy lies in stern and unrelenting punishment of the offenders when they are apprehended. The police are not powerless, nor inefficient, but they are not encouraged when they see the fruits of their diligence dissipated by mistaken leniency. Mercy should ever season justice, but the true precept teaches to be just before being generous.

When Power Passes.

The esteemed Boston Transcript, and the equally revered New York Times, were deeply pained when the senate passed the bill amending the Federal Reserve act. Each of these great newspapers is pained to note the monster of sectionalism and class government, rearing its horrid head, once more rampant in America. The Transcript particularly notes that, according to the vote, New England and New York are cut from the rest of the country, and are become "outsiders."

All this because an imposing majority of the senators of the United States voted that it would not be improper for the president to appoint a "dirt" farmer to the board, and prepared the way for such appointment by adding one more to the number composing the board. The Transcript is comforted by the thought that such a farmer may be as conservative as any banker on the board, but is apprehensive because of the class or sectional control implied by the action.

What really ails both the editors referred to is that the great empire on this side of the Alleghanies has attained mature stature and is able to do something for itself besides pay tribute to industrial New England and New York. So long as the handle of the spoon was controlled around Boston, while folks out west took any medicine it might contain, the situation was all right from New England's point of view. But the scene has changed, power has passed over the range, and instead of resting along the coast line from Bangor to Sandy Hook, it is now fairly well settled over the Mississippi valley.

This power will not be used to the detriment of any section of the country, but if there is proposes to share in that advantage. This is both a producing and a consuming region; we sell to New England, and we buy from them, zens of one country, and not as poor relations or inhabitants of another quarter of the earth. good reason why the finances of the country should be the exclusive care of the bankers.

What Really Ails India.

Lord Northcliffe has touched exactly on the ause of the unrest in India. Laying aside as negligible the so-called Hindu aspirations for elf-determination, he moves at once to the Mohammedan element. This he finds to be for the first time in history allied with the Hindu, and for the reason that it is opposed to Christian presence in Asia Minor. Back of it all lies a movement that has for its purpose the restoration of the Turk in control of all he forfeited

Resting the agitation on the necessity of Mecca, Medina and Bagdad, the clever politicians of the caliphate at once extend that to include the revival of the broken down Turkish empire, with political as well as religious domination Agitators who are going about in America, makthe Indian uprising are at great pains to conceal the ulterior motive that is underneath the effort. Restore the Turk to the position he held prior to 1914, and we will quickly see the dissolution of the partnership he now holds with the Hindu. Remove British influence from India, and we will soon note the disappearance of all Christianity has been able to do in that land for the amelioration of the condition under which the

To revive the control of the Turk in Asia Minor, and to again give over the millions of India to the mercies of native rulers and priests may seem attractive to the unthinking, who translate self-determination into terms that are intolerable to advancing civilization, but such a step will certainly add to the confusion in which the world welters.

Pope's Simple Life.

Details of the daily life of Pope Benedict XV, published after his death, add his name to that long list of successful men who have plicity. The daily routine of Pope Benedict was light, his recreation was confined mostly to walks in the gardens of the Vatican, his relaxations were conversations with his fellow clergy and

It is a story grown almost common because in industry and even in politics have found sucachievement.

The World-Herald has made a remarkable discovery. Governor McKelvie does not plan to save money-he is only going to refrain from administration of state affairs,

Florida and Georgia kukluckers continue to uphold the traditions of white supremacy by mobbing negroes who engage in anything but menial labor. Such is civilization's influence!

That young Massachusetts socialist who could resist a million dollars showed himself to be numan by falling for a vamp.

Legislators may approach the task they are called to in a spirit of levity, but the people are looking for relief.

Telling the farmers they are in a hole is no service. What they want to know is how to

get struck by an automobile. There is a bill in the senate to fix the price of wheat. While congress is about it, they might carry this a little further and guarantee a price

on golf balls. They say the high cost is entail-ing a positive hardship on the leisure classes. TODAY'S IDLE THOUGHT. No matter how mean a woman treats her husband while he is alive, she always plans on giving him a SWELL FUNERAL!

H. H. REMEDIES,

Dear Philo: I have found your articles so helpful and your philosophy so sound that I am coming to you for help in my trouble. We have an alarm clock with a sleep meter attachment which snores at night. How can I remedy this?
I will be up early looking for your answer.
Yours,
—Nell.

Dear Nell: Always glad to assist. We admit our philosophy is mostly SOUND. In regard to your alarm clock, if it is in the abit of sleeping on its back try turning it over. If this doesn't help, insert a bale of hay between the ticks. This will tend to deaden the noise, Don't get up too early or you may be looking for it before we get it ready.

A WISH. A girl won't sing the old, old stuff,

The gay songs nor the blue ones, d we wish she'd be kind enough To lay off of the new ones.

"Actions speak louder than words." "They have to, to make 'emselves heard."

Tim says: Diplomacy is the art of telling a lie in such a way that you like to think the other fellow believes it, although you know he doesn't.

PREFERRED THE CASH.

The knot was tied, the pair was wed, And then the smiling bridegroom said Unto the preacher, "Shall I pay To you the usual fee today, Or would you have me wait a year And give you then a hundred clear, If I should find the married state As happy as I estimate?" The preacher lost no time in thought, To his reply no study brought, There were no wrinkles on his brow: Said he, "I'll take \$3 now." -Anonymous.

for the southern training tables, anxious club managers are scanning the want ads for such For Sale—High grade shortstop, in first class condition. Used only four seasons. Small eater,

News item says a woman who slept 88 days was awakened by a phonograph.

Eighty-eight days is some nap, we admit, but being awakened by a phonograph is nothing new.

A BOUQUET.

(From one of the thousand bricks.) Yours is the tune that pleases me— Wisdom wise, with a laugh thrown in, That's the stuff that is sure to win.

When we have finished the daily news, Of dozens stung or killed by blues, Like a wiper our glasses you clear, Changing our vision from things so drear.

A "BEE" that's busy, swarming with joy, Whose sting is never allowed to annoy, Long may you buzz within our hive For happy are we when you arrive.

—J. C. B., Gothenburg, Neb.

There, P. R. B., is one from your old home town, sent in direct response to your invitation. Thanx, J. C. B. That's "saying it with flowers."

AFTER-THOUGHT: When you say it with smile you say a mouthful. PHILO.

Creating Wealth by Spending.

After the civil war this country entered upon a period of tremendous expansion of railroads and industries, and in doing this increased its wealth so rapidly as to be able to pay off its debt far in advance of what would have been possible under any niggardly system of with-holding money from wise expenditures of that kind. We can today better afford to create wealth by large construction undertakings than we can afford to skin down to the narrowest possible point in order to save. There is a withholding that leads to poverty; there is a wise expenditure that leads to prosperity. The building of the Nicaraguan canal, the develop-ment of Muscle Shoals, making the Tennessee river available for transportation, the improvement of the St. Lawrence as proposed, giving the west a direct water route to the ocean-would all, we believe, come under the head of wise ex-Columbus is where the Albert law came from. | penditures, viewed from every possible angle. - Manufacturers' Record.

How to Keep Well

Questions concerning hygiene, senitation and prevention of disease, submitted to Dr. Evans by readers of The Bee, will be answered personally, subject to proper limitation, where a stamped addressed envelope is enclosed. Dr. Evans will not make a diagnosis nor prescribe for individual diseases. Address letters in care of The Bee.
