Washington Society

Bureau of The Bee, Washington, April 8.

The Easter season this year will be an official one rather than otherwise, which is also unusual, for formal official affairs are nearly always over the first of April. And Easter day is unusually late this year.

For this reason it will be an unprecedentedly beautiful season with the various blossoming of the flowers.

Already in the parks, the few early buds left to city houses are gay and lovely with magnolia blossoms, crocuses which came late this season; tulips, daffodils and all such springtime blossoms of this season. And the Japanese cherry trees attract the equestrians and the few old-fashioned horse vehicles which may be seen on our streets, to Potomac park.

The cherry trees form the most beautiful lane along the edge of the path in turn bordered by the bands of purple iris, tulips, nasturtiums and many other beauties in their turn. Really Washington is a beautiful spot just now.

DOUGLAS 3901
"To Serve Humanity Better"

For Freckled, Rough or Muddy Complexion

The freckling, discoloring or roughening to which delicate skins are subject after exposure to wind or sun, often appearing in early spring, may readily be gotten rid of. Ordinary mercerized wax, spread lightly over the face before retiring and removed in the morning with soap and water, completely peels off the disfigured skin. Get an ounce of the wax at any drug store or toilet counter. There's no more effective way of banishing freckles, liver spots, moth patches, skin particles come off each day, so the process doesn't even temporarily mar the complexion, and one soon acquires a brand new, spotless, girlishly beautiful face.

The mercerized wax method is appreciated particularly by those who prefer "natural beauty" to that which is obviously otherwise.

Use a new shaving brush to grease baking tins.
