Ways to School Economy.

There has not been enough heard from teachers and school executives on how the high cost of education may be trimmed.

Efficiency must not be sacrificed, Mr. Westcott postulates, but all teachers should be required to teach the maximum number of classes.

Parents of school children frequently are surprised with stories brought home about special teachers breaking into the school day.

Frank T. Pearce, editor of the Diller Record, promises his support to Mr. Westcott for state superintendent of public instruction if he could be induced to run on this platform.

What "Papa" Joffre Saw.

Marshal Joffre saw at Lincoln on Saturday something he may treasure alongside the most memorable sights he has viewed in a long and active life.

Yet the simple ceremony he was a spectator of at Lincoln on Saturday deserves to be listed as one of the really great things he has witnessed.

Partisans may affect to scorn the ceremony of Saturday, to deride the beginning of a great enterprise, but the day will come when all the satisfied and prosperous people of this commonwealth will note with honest pride that they did tax themselves to erect a capitol that is a credit to replace one that has become a reproach to the state.

Record Vote on Navy Bill.

Congressman Kelley of Michigan, who reported the naval appropriation bill, says he will ask a record vote on the amendment adopted Saturday increasing the enlisted personnel to 86,000 instead of the 65,000 at which it was fixed by the committee.

This is one of the most important divisions of the session. Arguments have been earnest and long as to the merits of the question.

Germany and Russia have signed a new treaty, yet what the world would most appreciate would be a check on account.

The Mississippi valley is certainly wet enough, if that is what the world has been waiting for.

That "shoot-to-kill" order hasn't brought much fruit as yet.

Easter Sunday got by all right in Ireland.

asked for by Mr. Kelley ought to be had, that the country may know exactly the sentiment of congress.

The Faith of a Judge.

Law as a living process and not as the dead hand of the past imposing its will on changed conditions of which it knew nothing is an ideal that will not be hard to reach if there are many jurists such as Judge Benjamin N. Cardozo of the supreme court of New York.

There are no doubt some excellent citizens who will reject the theory announced by Judge Cardozo in his book, "The Nature of the Judicial Process."

The final cause of law is the welfare of society. The rule that misses its aim can not permanently justify its existence.

When they (i. e., judges) are called upon to say how far existing rules are to be extended or restricted, they must let the welfare of society fix the path, its direction and its distance.

Instead of criticizing the judicial system or groveling in depression at the failure of courts now and then to do all that might be hoped for, it would be better to get behind men of this type and strengthen their influence.

Hanging by the Big Toe.

Darwinism has scored another hit, but whether it is a home run or just a bit of a bunt remains to be determined.

Like Katisha's left elbow, the late lamented John Daniels, nee just a plain gorilla, had a big toe worth going miles to see.

There is a great deal of clinical proof that people with tendencies to convulsive disorders should be given some practical curative procedure.

Veterans "Clean-Up" Results.

Quietly but persistently the United States Veterans bureau has worked on a job that had caused others to despair.

Just now the big task is to get the information to those who are entitled to the aid. That is why the veterans clean-up looks so good.

Meat products, principally cured pork and lard, are showing a steady gradual increase in exports.

The drys announce they are pleased with the primary elections so far, while the wets point to substantial gains. It is a mighty fine election that pleases everybody.

A little more light on the Bureau of Printing and Engraving may serve to clear up what is now only an obnoxious fog.

Germany and Russia have signed a new treaty, yet what the world would most appreciate would be a check on account.

The Mississippi valley is certainly wet enough, if that is what the world has been waiting for.

That "shoot-to-kill" order hasn't brought much fruit as yet.

Easter Sunday got by all right in Ireland.

A Wonderful People

Thoughts Suggested by the Farewell Words of Margot.

(From the Boston Transcript.)

That we are a wonderful people in America must be a cause of much pride to us, and all true Americans will appreciate the great compliment which Mrs. Asquith has paid us on her return to England.

What gives a sensation of depression, however, in reading the report of her interview, is Mrs. Asquith's statement that although she enjoyed every minute of her stay in America, she did not contemplate returning.

That our late visitor should have come to America and held the series of causeries so much enjoyed and appreciated is in itself a cause for satisfaction.

When these bodies are removed purposely as in experiments, or by accident in the operation on the thyroid, or other structures in the neck, the animal from which they are removed has convulsions until death terminates the scene.

It has been suggested, but not proved, that in all forms of convulsions, and in all cases of epilepsy, these glands are diseased.

There is a great deal of clinical proof that people with tendencies to convulsive disorders should be given some practical curative procedure.

As a kidney wash Luckhardt and Rosenblum found a solution containing no lime was as effective as one which contained this mineral.

There is a great deal of clinical proof that people with tendencies to convulsive disorders should be given some practical curative procedure.

How lime does its work in these disorders is not known. Luckhardt and Rosenblum's second experiment proves that if lime is of benefit it is not by washing poisons from the blood through the kidneys.

W. B. writes: "As a saline cathartic draws water violently from the entire system, creating a thirst, and disperses it rapidly through the lower bowel, should it not have a tendency to reduce watery tissues?"

Saving the Golden Moments

The Detroit News publishes a photograph of Jimmie Dunn, discoverer of a means of conserving knowledge (which has been said to be power) for himself.

Any survival of the concept of fishing as "the contemplative man's recreation" can not last long. In the first place "the contemplative man" himself now an anomaly and a lumberer of the ground.

Among the truths which a great many signers of contemporary decadence and degeneracy hold to be self-evident is the truth that old men are a drag upon civilization.

A lively interest in the world of today, a great sympathy for liberty and intelligence working towards progress, an unflinching courage, a pungent tongue and pen—Charles W. Eliot is not quite an example of the seventeenth-century conservative and faddistic to whom so many of the world's ills are, by formula, attributable.

An Old Man Not So Wicked

Among the truths which a great many signers of contemporary decadence and degeneracy hold to be self-evident is the truth that old men are a drag upon civilization.

A lively interest in the world of today, a great sympathy for liberty and intelligence working towards progress, an unflinching courage, a pungent tongue and pen—Charles W. Eliot is not quite an example of the seventeenth-century conservative and faddistic to whom so many of the world's ills are, by formula, attributable.

With a proper radio outfit you can keep in touch with the gossip of the world, but we calculate it will be a long time before science replaces the Ladies' Sewing society in giving 100 per cent efficiency.—Philadelphia Inquirer.

Some men would rather rise to high rank in a fraternal order than rank high as a worker. And their work is likely to show it.—Forbes Magazine.

How to Keep Well

By DR. W. A. EVANS

Questions concerning hygiene, sanitation, diet, and other matters, should be submitted to Dr. Evans by readers of The Bee, will be answered personally subject to proper limitations, where a stamped, addressed envelope is enclosed.

LIME FOR CONVULSIONS.

This is not a Bog Wagon Fardou column and the incorrect statement which prompts this article did not appear in this column.

However, I was misled by that statement as to prevent them, others passed on the newspaper story to some who wrote me, and thus, in turn, misled others.

By daily injecting enough of this solution to keep the blood stream washed free from the substance which causes the convulsions, the way kept the dogs alive for about two months. It seems that they could have kept these dogs in good health indefinitely by washing the poison daily from the blood through the kidneys.

The parathyroids are four small bodies located in the neck behind the lateral lobes of the thyroid. They are small, weighing altogether only about six grains, and each measures about the size of a pea.

It has been suggested, but not proved, that in all forms of convulsions, and in all cases of epilepsy, these glands are diseased.

There is a great deal of clinical proof that people with tendencies to convulsive disorders should be given some practical curative procedure.

How lime does its work in these disorders is not known. Luckhardt and Rosenblum's second experiment proves that if lime is of benefit it is not by washing poisons from the blood through the kidneys.

W. B. writes: "As a saline cathartic draws water violently from the entire system, creating a thirst, and disperses it rapidly through the lower bowel, should it not have a tendency to reduce watery tissues?"

REPLY: The theory is that some of the salt, whatever it is, lags behind in the tissues, the rate of excretion not being equal to the rate of intake.

Nonbathers Get It, Too. J. L. W. writes: "What causes this terrible itching and is there anything you can do to relieve it?"

REPLY: Assuming that you have bath itch, your trouble is caused by the wast-

The Bee's Letter Box

(The Bee offers its readers freely to its readers who care to discuss any public question in connection with the Bee.)

Some certain number of dollars. If a person should make a note of that kind and the paper should bring an action in court on the note, the court would necessarily have to construe the note as payable on demand, or decide that the note was not enforceable, as no cause of action could ever accrue on it.

Our Interesting Currency. Omaha, April 15.—To the Editor of The Bee: I was an official, deprived me of all my earthly possessions, having a commercial value, but left me health, self respect, an aim in life, a will unshaken, a nerve unbroken, a sacred regard for truth and honesty, a joy in both work and play, family and friends to love and the confidence of my fellow townmen.

There are those who might be better off if they were not so well off.—Detroit News.

It is a mighty small caliber official who has not been photographed appearing in on a radio set in Indianapolis Star.

The old-fashioned actress who had her jewels stolen has been crowded off the front page by the millinaire whose house cellar has been raided.—Columbia (S. C.) Record.

Jury discharged after 56 hours of deliberations in a Los Angeles murder case is said to have disagreed only on the question of guilt or innocence. Probably it agreed perfectly on weather, baseball, prohibition, etc.—Cleveland News.

SLOAN'S RELIEVES NEURALGIC ACHES FOR forty years Sloan's Liniment has been the quickest relief for neuralgia, sciatica and rheumatism, tired muscles and lame backs.

These golden sprains and strains which unfit you for work or play are soon eased when Sloan's is used.

Where this condition is extreme, it is advisable to cleanse the skin with creams, using neither soap nor water. Cases not so extreme can use bran water or borax water, but not soap water.

Sometimes soaps can be used if bathing is not done with great frequency and provided the soap is of good quality.

On the Ragged Edge. T. C. writes: "If, after taking starches such as bread, beans, etc., and within an hour or two a trace of starch shows in the urine and then within three to four hours there is no sign of sugar in the urine, would you call it diabetes?"

REPLY: You have what is called a diminished tolerance for sugar. You are probably not a diabetic now, but are probably on the ragged edge.

REPLY: You have bath itch, your trouble is caused by the wast-

REPLY: Assuming that you have bath itch, your trouble is caused by the wast-

Let these books tell you about Colorado

THE glories of its mighty granite peaks towering far above the timber line; its deep canyons; gem-like lakes and laughing cataracts.

Its roaming deer, bounding bighorn sheep and busy beavers; its brightly-plumaged birds and brilliant wild flowers—mariposa lily, forget-me-not, columbine; its glorious sunshine and cool, bracing air; its irresistible invitations to play and recreation.

Accommodations to suit every taste—ranches, camps, inns and luxurious hotels. The books tell the whole story.

Write for "Colorado's Mountain Playgrounds" and "Rocky Mountain National (Estes) Park." Yellowstone National Park book, too. They are free.

Fares Greatly Reduced and War Tax Gene Round trip only little more than the fare one way.

April is vacation planning month for summer vacations. Let us tell you how cheaply you can visit Colorado. Then you will want to go on to Salt Lake City and Yellowstone National Park.
