Recognition for Mexico.

Propaganda on behalf of Mexico is again being carried on at the capital, and through the press to the nation. Here is a place where the facts should be kept straight.

Efforts are made to create an impression that the attitude of the United States is taken on behalf of "big business" and therefore is unjust.

Following the revolution we find the big oil companies, the mining companies, and the railroads still doing business.

Mr. Harding and Mr. Hughes are trying to secure compensation for the little fellows who suffered, some reparation for the 540 Americans who are known to have been murdered by Mexicans.

as is possible in a live community, and this is not possible so long as the authorities are at loggerheads, and the fascinating game of passing the buck is indulged in all around.

Politics Out of Order.

Once again, as in the case of the soldier bonus legislation, the lower house of congress has acted upon a great national question without much regard to political lines.

This action is quite in accord with the history of naval appropriations in recent years. It was under Presidents Roosevelt and Taft, republicans, that the navy was developed as a vigorous arm for national defense.

On the other hand these programs of development—sometimes unreasonably extravagant—have been opposed both by republican and democratic members of congress.

Discovery of a 5-year-old lad who had been confined in a basement for two months on account of disobedience leads the thoughts toward the question of how far parental brutality may wisely go.

The newspaper dispatch does not tell of what infamous crime this boy of 5 had been tried and convicted by his elders.

Adam Breede—If there are any statues of famous Nebraskans in the state capitol, Lincoln is the Nebraska hall of fame, I would suggest the name of Gen. John Pershing because he is America's greatest hero.

Every industrial establishment and many homes have their first aid cabinets. I agree with the opinion that bichloride of mercury should never be found in such cabinets.

Nebraska's Hall of Fame

State Editors Nominate Men Who Deserve To Be Honored. Holdrege Progress.

E. J. O'Shea—It has been suggested that Nebraska perpetuate the memory of its famous citizens by placing their statues in a hall of fame in the new state capitol building.

John M. Thayer, statesman and soldier, in recognition of his services to the early pioneers of the state during the Indian uprisings, an early governor of the state, brigadier general of the United States volunteers during the civil war, and territorial law maker.

Col. John M. Stotsenberg, who gallantly died on the field of battle, leading Nebraska's fighting regiment in the Philippines; recognition of his services more than any other man of that regiment and to the state should mark him as one of Nebraska's foremost citizens.

In recognition of his services as a member of the commission named by Gov. David Butler to locate the state capitol, the statue of Thomas P. Kennard should be one to be placed in Nebraska's hall of fame.

For the Kearney Daily Hub. John M. Thayer, J. Sterling Morton, and Edward Rosewater. Thayer a soldier, a patriot, a senator, and a governor, Nebraska has had none nobler.

Don C. Vandusen—Nebraska's new capitol building should contain statues of those Nebraskans who have contributed most to the welfare and fame of the state.

Edwards Rosewater, now gone to his fathers, is our second choice for the Nebraska hall of fame. He is a great newspaper editor, a prize-winning writer when he founded The Omaha Bee, the paper of the great northwest.

How to Keep Well

By DR. W. A. EVANS. Questions concerning hygiene, sanitation and prevention of disease, submitted to Dr. Evans by readers of The Bee, will be answered personally, subject to proper limitation, where a stamped, addressed envelope is sent. Dr. Evans will not make diagnosis or prescribe for individual diseases. Address letters in care of The Bee.

INJURIES IN FACTORIES. Dr. H. R. Owen has some views on the treatment of wounds which it will be well for men working around industrial plants to take into consideration.

There is no need of using it in a clean wound. If used in carbuncles, boils and abscesses with small openings, the gas is liable to drive bacteria deep into the tissues.

By cleaning a wound is meant cleansing around the edges with a neutral soap and sterilized water, followed by ether.

In treating wounds he uses more ether than he does iodine. Many wounds will heal nicely if properly cleaned and kept clean without the application of any dressing unless it be clean gauze.

Unnecessary stitching is not only a needless painful operation, but it may prevent the entrance of seal the wound together.

No adhesive plaster should be used to cover up the edges of a wound. Plaster is seldom used, and wounds need some aid and light. The bacteria in the skin under the plaster may do considerable harm.

Iodine has its place as an application for wounds, but the routine application of every wound and the use of iodine as a dressing, does more harm than good. It is all right to use it around wounds, but it should not be poured into every wound at least.

The Bee's Letter Box

(The Bee offers its columns freely to its readers who care to discuss any public question. It requests that letters be addressed to the editor of The Bee, and also include the name of the writer accompanied each letter, not necessarily for publication, but so that we may know with whom we are dealing. The Bee will not print the name of any contributor or his address, except by special arrangement.)

Christian Science vs. Doyle. Omaha, April 20.—To the Editor of The Bee: A press report in a recent issue of The Bee quotes a spiritualist, who is just now receiving much publicity in the papers, as having compared the healing works of Christ with that done by spiritualistic mediums.

With no intention to reflect on the motives of individuals who may endeavor any of the numerous systems of so-called healing, I would like to direct attention to the distinction between the healing works of Christ and that done by spiritualistic mediums.

Christian Science avers that the healing works performed by Christ Jesus were achieved on the proposition that there is but one God, one spirit, one soul, and that which God creates is spiritual and good, like Him. It also maintains that God does not create or know anything that is evil or material.

Spiritualism, psychology, mental suggestion and so on, all rely on the theory of many spirits, souls and minds dwelling in finite, material bodies, from whence they are freed by death, a belief which Christian Science contends is not supported by the words and works of Christ Jesus.

This distinction between that which is truly God and that which is wholly material, or supposed to be a combination of the physical and spiritual, was explained by Jesus to Nicodemus in this direct language: "That which is born of the flesh is flesh; and that which is born of the spirit is spirit" (John 3:6).

The healing which Christ Jesus did is an awakening to the truth of spiritual being, in which one perceives the nothingness of any other sense of existence. It does not regulate or connect the physical with the spiritual by any process of reasoning, nor does it endow the human mind with any power, intelligence or reality, or recognize the human sense of death as having any part in the divine order.

Jesus said of the scriptures, "They are they which testify of me" (John 5:39). Bible says, "The central theme of the Bible is Christ. This being true, then every part of the Bible must be understood and accurately interpreted." (The Bible)
