Instruct Inspectors to Watch Egg Sales

Lincoln-While Nebraska has no egg candling law, dairy and food inpectors of the state department of Sidney. agriculture are being instructed to ay particular stress on the egg situation and to prosecute the law under that section which defines foods as adulterated "if it consists in whole

diers of eggs, and point out to the farmer, merchant and dealer that it is a violation of the law to sell, or offer for sale, eggs that are not fersile," says the secretary! "At this season of the year eggs are more extensively handled and produced, and the department desires to protect the seller and dealers as well as the consumer.

No culling will be done at the meetings.

Dr. Caroline Hedger, an authority on child nutrition connected with the Merchild nutrition connected with the

spring, the University of Nebraska

spring, the University of Nebraska agricultural college considers it a safe practice to make a general germination test to be sure that it will grow. In referring to other considerations in selecting seed corn, an amouncement says:

"It is a common practice to select for seed ears which resemble in type those produced under more favorable climatic conditions and which require a relatively long growing season.

Corn investigations indicate that relatively long smooth and shallow ears out yield the deeper rough corn about 8 per cent. The smoother corn is somewhat earlier and apparently is best adapted to Nebraska conditions.

"The deeper kerneled ears have been favored by many because of their having a higher selling per cent, but, it has been shown, this does not necessarily mean a high yield part.

Nothing Unexpected.

As a matter of fact, nothing has happened at the Genome which in one day or another that the Ghancis consumity had not expected.

What the stock markes had in view in its recent forward movement was revival in trade, and men of financial expected with the regard. The weekly interested the confirm the prediction: they are still given up mostly in describing the absence of vigorous business reconvery. That is what always happens however, during a considerable period after stock market, bank clearions, railway traffic, steel orders and all the other familiar indications of coming revival are in evidence as they have been in the past few weeks. One is reminded of 1912, when same discouraged inquirers went to the summer to an comment industrial manager to assiff there was any chance of a sceal trade revival, and received the anasor:

"My Dear Sirs; It is here already."
