

C. of C. Against Increased Rates for Dial Phones

Resolution Also States Proposed Raise in P. B. X. Rates Disproportionate to Other Charges

The Omaha Chamber of Commerce took its stand yesterday against the charging of higher rates for the use of the dial telephone than for the manual, and against the "proposed increase in rates for private branch exchanges to the extent that they are disproportionate to the increases proposed for individuals, business and residential services in Omaha and other communities served by the Northwestern Bell Telephone company."

The executive committee passed a resolution which reads in part: "Resolved that the Omaha Chamber of Commerce favors the establishment of just and reasonable telephone rates in Nebraska which will afford economical and efficient service to the public and yield adequate revenues to the telephone company."

"We believe that the Nebraska State Railway commission is well qualified to decide on the merits of the application of the Northwestern Bell company for increased revenue. In the event, however, that an increase is justifiable, the Chamber of Commerce questions the propriety of the proposed increases in rates for private branch exchanges to the extent that they are disproportionate to the increases proposed for individuals, business and residential services in Omaha and other communities."

The manager of the chamber's traffic bureau is instructed to lay the resolution before the state railway commission on the resumption of the rate hearing, May 22.

Dry Laws Keep Hotel Rates Up, Says Eastern Hotel Man

Prohibition is partly responsible for the inability of hotels to reduce room rates, in the opinion of Roy S. Hubbell, manager of the Hotel Commodore in New York, who was a guest at Hotel Fontenelle yesterday.

"I dislike to touch on the prohibition subject," said Mr. Hubbell, "but it is a fact that dry laws have greatly cut down the revenue of hotels."

Mr. Hubbell expressed great surprise at finding the same standard of service and cuisine in the west as in New York. "The more skilled hotel help naturally rotates about New York," he said, "but I find service equal to that of New York in many western cities. By the way, I started out from New York looking for the 'out-mentioned' general depression. I've made 12 cities, and thus far I've failed to find it."

Council Compromises on \$20,000 Damage Suit

City council committee of the whole, acting on the recommendation of John F. Moriarty, city solicitor, agreed yesterday to compromise a \$20,000 damage suit brought by Flora E. Webber, by allowing the plaintiff \$1,000.

Mrs. Webber, while walking at Twentieth and Leavenworth streets, November 11, 1920, was struck by an automobile driven by Oscar A. Scott, then superintendent of street lighting. Mr. Scott has only one arm.

Attorney Moriarty advised the council that in his judgment a trial of the case before a jury would result in a judgment of considerably more than \$1,000. Mrs. Webber suffered injuries on her arms, sides, hips and back.
