

### Girl Takes Love Notes, Then Jilts Him, Man Claims

Wealthy Oklahoma Farmer Enlists Aid of Police to Recover Love Letters Stolen From Him.

"Why, I didn't even think the simple old fool would believe me," retorted Bertha Duhigg, 18, yesterday to the officer who recovered from her love letters she is alleged to have written John Franz, 32, Nordin, Okl., Detective William Davis reported on his return to Central police headquarters.

The girl is a pretty little candy saleswoman in one of the big city department stores.

The man is a wealthy farmer from Oklahoma.

Correspondence between them began when it was prompted by the girl's uncle, Michael Duhigg, who knew Franz.

Proposal Accepted.

Letters flew back and forth between the two, and Franz alleges he proposed to the girl and she accepted him.

He came all the way to Omaha Saturday to marry her, he told police, and went out to her house to be entertained.

He took his grip out there with him, he alleged, and then she stole from it the love letters he prized so highly, and then rejected him.

He appealed to police to recover the letters.

Detectives did this, and then the sorrowing man slipped away and disappeared.

At Work as Usual.

The girl in the case, however, was at her place in the big department store dishing out sweets as usual.

"Oh, he's going away, is he?" said the girl yesterday afternoon. "Well, it's all right with me if he does."

Her mother came up from Fremont Tuesday, she said, and arranged to room with her at Mrs. Frank Sullivan's rooming house.

### Soaking Rains Put Cattle Ranges in Good Condition

Wood Lake, Neb., May 24.—(Special.)—The soaking rains received here have put the cattle ranges in fine condition. Indications also are for a bumper hay crop. Ranchers have put their cattle on the summer range and report the condition of the stock to be the best in many years, due to the mild winter and abundance of feed.

### Unknown Foods

You do not ask your family to sit down to the table with unknown guests.

Are you equally careful about the meats you invite them to eat? Equally sure of where they come from, what they are, who stands sponsor for them?

Nowadays, fortunately, the risk is not great. But with Swift & Company's products there is none.

Swift & Company's products are the result of years of experience, of careful, conscientious effort.

Their quality is a constant factor, always to be depended upon. The consumer is doubly protected because, in addition to the care used by Swift & Company, Swift's food products are carefully inspected by government employes and bear the federal inspection stamp.

The word "Premium" on ham or bacon means that we stake our pride and the reputation of years on that ham or bacon.

These products have been selected, cured, smoked, and handled by workmen who take the same pride in our products that we do.

Be sure of Swift's products and thus make certain that no strange or unknown food is introduced into the family circle!

- Well-known Foods of Well-known Quality

### Majestic of Rails Goes on Trial Trip

The largest and fastest passenger engine on the Union Pacific system made its first trip under its own steam yesterday from the railroad.

It will make its maiden overland trip probably next week, according to A. H. Fetters, mechanical engineer of the Union Pacific, who designed the engine.

As the huge steel steed pulled majestically out of the yards yesterday its designers and operators wreathed in proud smiles, stood triumphantly in the cab waving to a group of admirers, veteran trainmen.

Mr. Fetters himself was in the cab, with John L. Mohun and A. D. Bradner, draughtsmen; Harry Ballinger, veteran engineer, and Daniel F. Reinert, fireman.

An idea of the new engine's size and capability may be gathered from the following specifications:

Four 73-inch drive wheels.

Weight in working order, 345,000 pounds.

Weight with tender, 580,000 pounds.

Capacity of water tank, 12,000 gallons.

The engine will pull 20 passenger cars at 70 miles an hour.

Capacity of coal, 20 tons.

Speed capability, pulling 20 passenger cars, 70 miles an hour.

Has automatic stoker fed by steam operated by small jet.

The engine is destined for mountain climbing. It was designed by Union Pacific engineers and made by the American Locomotive works in Schenectady, N. Y. It was shipped to Omaha in parts and assembled.

### Attack on Movies Made at Assembly of Presbyterians

Speaker Waving Letter From "Bill" Hart Charges Film Interests Ridicule Ministry.

By the Associated Press. Des Moines, Ia., May 24.—Waving a letter from William (Bill) Hart, two-gun motion picture star, in the faces of 800 Presbyterian commissioners of the 134th general assembly here yesterday afternoon, Rev. Dr. Gustav Briegleb of Pasadena, charged that film interests are ridiculing Protestant pastors in their pictures in retaliation for the censorship campaign being conducted against them by Protestant denominations.

Hart's letter was in reply to one from the California pastor protesting against a picture in which a pastor is portrayed as robbing a stage coach in order to complete the construction of a small church. The "grim hero of the studios," who is himself the author of the scenario in question, replied to the criticism that he admires "a man brave enough to go ahead with his good work although it involves robbing a stage coach."

Saved From Nose.

Later in the picture the pastor is caught by a posse and Hart saves him from hanging only by cutting the ropes with a well-directed shot from his trusty pistol.

"Show me a film which ridicules or insults a Catholic priest or a Jewish rabbi in this manner," shouted Dr. Briegleb. Their insults are aimed at us. Twice Briegleb's speaking time was extended by vote of general assembly. The attack on motion pictures made by the committee on temperance and moral welfare in its report earlier in the day, gave only a hint of the storm which burst when Dr. Briegleb took the platform. Boycott of theaters showing objectionable films, and national censorship at the point of production, based upon a federal law, were urged by the resolution adopted.

Approve Anti-Lynch Bill.

Approval of the Dyer anti-lynching bill, now before the senate, was expressed in a resolution adopted at the instance of the standing committee on freedmen, submitted by Dr. Thomas B. Harris of Englewood, N. C.

Urgent need of a larger number of candidates for the ministry was asserted by the standing committee on theological seminaries.

The following nominations were made to fill vacancies in the membership of the permanent judicial commission, to serve from 1922 to 1925:

Rev. Gustav A. Hulbert, Baltimore; Matthew F. Smith, Indianapolis; Harry Noble Wilson, St. Paul; Judge C. Ross Hume, Anadarko, Okl.; and Robert Young, Los Angeles. Elections will be held Thursday morning.

Friction in university religious extension work was revealed by a resolution issued by Dr. Wallace Radcliffe, Washington, D. C., referring to conditions which have arisen in connection with "our task at state universities prejudicial to the development of our work—for example, incompatibilities between workers, unsatisfactory conditions in local churches and policies in connection with the sale and erection of buildings.

Appointment of three ministers and two elders as a committee to investigate these conditions, to report to the 1923 general assembly, was authorized.

Wants Tobacco Abandoned.

Need for adults to give up tobacco, profanity, rouge and other weaknesses as an example to youngsters was voiced by Miss Mand M. Aldrich, field worker of the board of temperance and moral welfare.

The presence of prohibition laws on the statute books does not mean that the liquor traffic will succumb without vigilance on the part of law-abiding citizens, Dr. Charles Scanlon, general secretary of the committee on temperance and moral welfare, said, adding that the presence of the ten commandments in the decalogue does not make their enforcement automatic.

Tourist Camp Completed.

Oshkosh, Neb., May 24.—(Special.)—A modern tourist camping ground has been completed in this city. Plenty of shade, a well and all other necessities for the comfort of the traveler have been provided, all located within four blocks of the business center of town.

Pupils Give May Fete.

Oshkosh, Neb., May 24.—(Special.)—More than 100 grade school children took part in the May fete on the school grounds. This event concluded the entertainments by the grade schools for the year.

### British Flyers Hop Off on Around-World Trip

(Continued from Page One.)

a folding bed that was part of the equipment in order to lighten up the machine.

Col. Broome, the scientific member of the party, who has spent many years in Alaska, the Aleutian islands and the Pacific northwest, said the party would explore Iceland and Greenland if time permitted.

Not all the air experts who watched the preparations for the flight were so optimistic as the leader. Some thought the DH-9 was small and frail for such a flight and expressed misgivings regarding the ability of the airman to complete the journey.

Brilliant sunshine with a light breeze made the weather conditions perfect for the take off. An official time was given to the event by the presence of Maj. Gen. Sir William Branker, director of civil aviation.

The machine the aviators are using is a DH-9, capable of making 115 miles an hour. It has the very latest equipment for comfort and special attention has been paid to the petrol systems. A thorough test has been given the machine and it was taken up again today by Pilot MacMillan for the final spin prior to the great flight, which is expected to last 90 days.

The first stop was to be at Paris. Tomorrow the aviators expect to reach Lyons, France, and thence will fly to Rome and by stages through India, China, Japan, Alaska and the United States, crossing the Atlantic from New Foundland via Greenland and Iceland.

While Maj. Blake and his fellow aviators made their start in a DH-9 airplane, their arrangements have contemplated the use of four machines of different makes for different parts of the journey. Announcements of their plans had indicated that they hope to get as far as Calcutta with their first machine, traversing the ordinary route to India, by way of Paris, Rome, Athens, Crete, Alexandria, Bagdad, Bazar, Karachi and Delhi, which is approximately 7,000 miles.

On the next stage the use of a Fairie type 3, a floating seaplane, has been planned. In this machine, fitted with a 360-horsepower Rolls-Royce engine, the airman would fly from Calcutta and proceed via Rangoon, Bangkok, Saigon and along the Chinese coast to Japan, Yokohama, and then to Petropavlosk and along the Aleutian islands and the Alaskan coast to Vancouver.

Change to DH-9.

At Vancouver the plan calls for a change into another DH-9 machine for the crossing of Canada, with a swerve down to Chicago, and thence to New York.

After using this machine for the flight to Newfoundland, the airman propose taking up their fourth machine, an F-3 flying boat, with two 300-horsepower Rolls-Royce engines, and flying on this machine across Greenland, Iceland and the Faro islands to Scotland, landing at Aberdeen. Maj. Blake has estimated that he would spend approximately 300 hours in the air.

Farmers at North Platte Investigating High Taxes.

North Platte, Neb., May 24.—(Special.)—Fifty or more farmers met in this city and appointed a committee of five to inquire into high taxation and if possible suggest means for reduction. The committee will make its report as a meeting to be held June 3.

### DIABETES

A Disease of Malnutrition

Diabetes in invariably the result of impaired nutrition—this results in an excess of sugar in the blood and failure of the food to nourish, hence a gradual wasting away while eating well.

### Warner's Safe Diabetes Remedy

is made from a formula tried and tested and used with remarkable results during the past 50 years. As the name indicates, Warner's Safe Diabetes Remedy is absolutely safe and is made solely from herbs and other beneficial ingredients.

### Warner's Safe Remedies

ADVERTISINGMENT.

Just Apply This Paste and Hairs Will Vanish

(Boudoir Secrets.) The judicious use of a delatone paste insures any woman a clear, hairless skin. To prepare the paste, mix a little of the powdered delatone with some water, then apply to the objectionable hairs for two or three minutes. When the paste is removed, and the skin washed, every trace of hair will have vanished. No pain attends the use of the delatone and it will not mar the most sensitive skin, but to insure results see that you get real delatone.
