Licensing of Seed Growers Is Stuhr Plan

Secretary of Agriculture Seeks Method to Better Prices for Higher Quality Grain.

Lincoln, Neb., May 24 .- (Special.) -Leo Stuhr, secretary of agriculfavor a compulsory grain grading law, under a state inspection and licensing system, as a means of getting farmers better prices for grain. Stuhr's decision on this method as the best to attain results followed attendance at the meeting of the Southwestern Wheat Improvers' asociation at Topeka, Kan. Stuhr declared that farmers will

not endeavor to raise a better grade of wheat so long as local buyers make little or no distinction as to quality, except by the weight test per bushel. An educational campaign decided upon at the meeting includes the following:

Publicity and advertising; improvement of seed by having it certified through associations of crop growers; special trains to be run

growers; special trains to be run during July and August with means of educating farmers in the best method of harvesting and stacking grain and preparing the seed bed for the next crop; preparation of sam-ples of different grades to be sent country elevator stations and banks, where farmers can see the difference between various grades wheat; educational campaign which will instruct country buyers how to distinguish between differ-ent grades of wheat.

Polk Farmer Tops Market

Silly Song By A CUCKOO BIRD -

Little Jimmy Bunyan and his baby brother. Fred, were tucked away quite snugly in their cozy trundle bed. When their mother heard a racket she hurried to the door and found her sons in battle, rolling on the bedroam floor. They had looked out through the window where the moon in splendor shone and little freed had promptly claimed that Fred had promptly claimed that planet for his own. But his brother, Jim, contested his possession of the same, and they cleared their decks for action, to disprove each other's claim. Now the battle of these brothers may seem funny; but, my friend, did you ever chance to ponder on the efforts that we spend, and the joy we let slip by us, as we butt against the stone, in our effort to accumulate and brand something our own? There is nothing in creation can be owned, by me or you, only in the same proportion that our broth-ers own it, too. Comprehension is possession, but in ignorance we plod; reaching for the moon, and spurning equal partnership with God (Copyright, 1922.)
