

Ford Rejects U. S. Counter Plan on Muscle Shoals

Cannot Consent to Elimination of Gorgas Plant, Auto Manufacturer Writes in Letter to Kahn.

Washington, June 1.—Henry Ford's reply to the counter proposal drafted by the house military committee for development of the government projects at Muscle Shoals, Ala., was presented today to the committee by J. W. Worthington, a representative of Mr. Ford immediately upon arrival here from Detroit, where he conferred with the motor manufacturer.

Mr. Ford's answer, made in the form of a letter to Chairman Kahn, definitely rejected the provision in the committee plan which eliminated the steam plant at Gorgas, Ala., from the properties to be disposed of by the government with the Muscle Shoals properties.

"I cannot consent to eliminate the Gorgas plant," the latter said, "because it is necessary to the economical operation of Muscle Shoals properties. If my revised offer for Gorgas is rejected, then I must understand that the acceptance of my offer for Muscle Shoals as a whole and not in part is refused."

Virtual Ultimatum. Mr. Ford presented a virtual ultimatum on the question, agreeing to minor modifications of his offer, but insisting he wanted the committee to consider this proposal (presented today) as final and that no further changes should be expected.

Request was made by the manufacturer that the committee send his final offer to the house for a vote on acceptance or rejection.

"If congress votes acceptance of my offer," Mr. Ford continued, "we will get on the job at Muscle Shoals at once, but if congress rejects it that will be but the beginning of a more determined effort on my part to save Muscle Shoals for the benefit of the public."

Immediately upon receiving Mr. Ford's letter the house committee went into executive session to consider it. Members would not forecast what action would be taken, but in some quarters it was believed that the committee finally would vote to meet Mr. Ford's demand as to the purchase of the Gorgas plant.

Pioneer Blair Doctor Is Found Dead in Bed

Blair, Neb., June 1.—(Special Telegram.)—Dr. W. H. Palmer, 83, and for over 40 years a leading physician of this city, was found dead in his bed at the home of his son-in-law, Dr. R. J. Murdock, where his wife and himself had been making their home.

He was born in Stark county, Ohio, and came to Blair in 1872, entering the drug business, in which he remained until about 12 years ago, when he retired and also gave up his medical practice. He was married January 25, 1872, to Miss Margaret Davis, who, with three daughters, Mrs. J. F. Williams of Kingville, Tex.; Mrs. Gunner Wingard of Tacoma, Wash.; and Mrs. R. J. Murdock of this city, survives him.

Dr. Palmer entered the civil war with the 53d Illinois infantry, in which he served for about a year, afterwards re-enlisting and served to the end of the war. He had been an active member of John A. Dix post, G. A. R. of this city, and at the Decoration day services carried his musket and went to the cemetery with his post.

Dr. Palmer was a member of the Masonic order, having served through all the offices of the blue lodge chapter, and was past commander of Jordon commandery No. 15, under whose auspices the funeral services will be conducted.

Business Man Kills Self Accidentally

Oskosh, Neb., June 1.—(Special.)—L. A. French, Lewellen business man, took an old revolver out of the house stating to members of his family that he was going to shoot a cat. A few minutes later his small son ran into the house crying and saying that his father had killed himself.

French was found lying in a vacant lot about 30 yards from the house and died a few minutes later. There was a bullet wound near the heart and one chamber of the revolver was empty. It is thought that the shot was accidental as no motive is known for suicide. French had made considerable practice of swirling the gun around his index finger and firing at a target without aiming. It is thought that he attempted this and miscalculated.

Stock Growers Meeting Will Be Held in Hyannis

Information from Mayor Sibbitts of Hyannis received at the stock yards is to the effect that the annual meeting of the Nebraska Stock Growers' association scheduled at Hyannis June 15-17 is to be a big affair.

A program of horse racing, steer roping and broncho busting has been arranged by Bert Hayward and Earl Monahan and all other business will be laid aside by the people of the sand hills country for a big event. A big attendance is expected by President Robert Graham of Alliance, who sends word that everything possible has been done to give the visitors a good time.

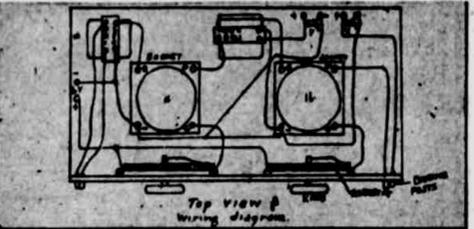

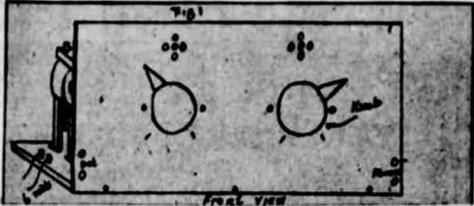

Summer Feeder Tops Omaha Market Third Time in Year

For the third time this year the top price has been reached by W. C. Washburn of Omaha, who received \$8.75 a hundred at the Omaha stock yards for 18 head of high quality Hereford yearlings averaging 888 pounds.

Mr. Washburn was on the Omaha market in January, when he received the top price of \$7.50 a hundred for a shipment of mixed yearlings and May 2 he again received the top price for the day of \$8.35 a hundred for 18 heifers.

RADIO

Radio Frequency Amplifier Serves to Increase Range for Receiving

With the prevalence of heavy "static" in the air and the advent of Northern Lights interference near, many amateurs are thinking of laying out their sets for the summer.

Those radio fans who wish to stick to the game through these months by using an audio set would do well to install an amplifier to their receiver. Two types of amplifiers are on the market for clear and long distance receiving, namely, audio frequency and radio frequency.

Radio frequency amplifiers are placed BEFORE the detector tube and amplify the incoming oscillations in the exact form that they are received.

Audio frequency amplifiers are placed AFTER the detector tube and amplify the rectified oscillations or audio frequency currents.

Audio Frequency for Volume. Audio frequency amplifiers should be used where volume is desired, and radio frequency amplifiers should be used where it is wished to increase the range. A combination of the two types will make a set capable of long range and loud signals.

For moderate range, the audio detector and one-stage radio frequency amplifier will prove valuable. The amplifier may be purchased ready for connection to the detector set or it may be built.

The panel of bakelite should be 7 by 10 inches. A base of bakelite or wood should be attached by screws to the back of the panel. A radio frequency amplifying transformer should next be purchased. This should be of a reputable make.

Construction Simple. Other parts necessary for the amplifier include a detector, and an amplifying tube, two tube sockets,

two rheostats, a six-volt A battery, two B batteries—one 22½ volts, the other 45 volts—a grid condenser and a grid leak and 10 binding posts. "Peep" holes, about an inch in diameter, should be drilled above the position of the knobs on the panel as shown in Fig. 1 of the diagrams.

Although a detector and amplifier can be made to operate with a single B battery, it is advisable to use two in this case. The amplifier tube should have one of about 45 volts and the detector tube one of about 22½ volts. The same A battery can be used for both tubes. Binding posts should be placed as shown in the diagrams. The A and B battery posts are mounted on the transformer base. The arrangement obviates the necessity of bringing scrawly battery wires across the front of the panel. If the radio fan wishes to mount the amplifier in a case the battery binding posts may be attached to the side or back of the cabinet.

Always remember that the positive terminal of the B battery invariably goes to the plate of a tube.

SPARKS

Herewith are listed the call letters and locations of additional broadcasting stations as listed in the government directory:

- Location: WRI—Schenectady, N. Y.—Union college.
- WRR—Dallas, Tex.—Police department.
- WRW—Tarrytown, N. Y.—Tarrytown Radio Research Lab.
- WVW—New York—Amateur Radio Service.
- WWJ—Detroit—Detroit News.

Other stations will be listed in the radio columns of The Bee tomorrow.

The Bee leads all the other papers in sport news. Read The Bee first.

Friday In Our Big Basement THE BRANDEIS STORE
