over the grounds, and went into Saint George's Chapel—the queen's private one. Here are buried, Charles I., George I., Henry VI., and Henry VIII., and Ed IV., Jane Seymour, Prince Leopold. Then they have an elegant shrine to the princess that would have been queen if she had lived. She died in child birth, and they have a figure of her rising from the tomb to Heaven with an angel on each side, one of them holding the baby who died also. On the steps leading to it are the mourners fallen prostrate and kneeling before it. It is an elegant work of art but it was too vivid to enjoy looking upon. In the chancel all the seats were magnificently carved and each member of royalty has his own, the Queen and Prince of Wales facing the altar. Will explain better when I get home, this is a poor description. The gate under queen's box was presented by Edward the fourth, and he was buried under it. It is the finest piece of wrought iron work in the world. We were not able to get in Prince Albert's Memorial Chapel where he is buried. Windsor Castle is immense and if there should ever be war, they would have a hard time getting at the queen as the castle is built up high and looks impregnable. We came home more tired than ever but start tomorrow to Deal on one of the seas. We both need rest or our nerves will get the better of us. However, we wouldn't have missed this for anything and will feel wide awake as ever after a few day's rest. Will close now as it is getting near dinner time.

AGNES SEWELL SILVER.

Stand up for Nebraska!

Dr. R. E. Giffen is giving little articulation seances in his office since the arrival of his new X ray Willyoung Coil machine. Tuesday evening a number of newspaper men gathered in the consulting room to see what they have read of. To see one's own bones, to move the arm and hand and to see the delicate, beautiful bones of the wrist and the wonderful articulation of the elbow joint respond instantly to the capricious movements is a new sensation that, up to date, only ghosts who have left the body have enjoyed on looking back. Such an experience is a step if only a short one, towards getting outside of the body-prison that Mrs. Besant talked about. In the case of Joe Mason his heart could be seen regularly pumping the blood into the arteries and receiving it again from the veins. It pumped regularly and slowly not withstanding the heat and other things. The light itself, which thus anticipates the experiences of the disembodied spirit is invisible except for a pale greenish fluttering in the bulb which contains the unknown, reserved essence. In the unscientific who know not how to call it long hard names and treat with it on terms of equality it creates the awe the first savage felt, who saw a gun fired for

LADIES

THAT OLD FUR GARMENT is worth almost as much today as the day you bought it; but you don't know it. As long as the hair is on the skin it is GOD. Moth eaten or worn

pots can be taken out without even showing a seam. The only question is what can be done with it? Its out of style and worn. Maybe it needs a new lining, or should be stylishly trimmed. That old coat would make a beautiful cape, and capes are just the thing this season. There's that old fur garment you haven't worn for years, because it is all "fagged out." Why, that will make a beautiful collar; just the thing for fall and spring wear. Then just look at that garment. It is entirely "gone up," the hair stands the wrong way on it, and it is worn and matted. "Its no earthly use." Well, it does look bad, but by the process of glazing the fur is brought out and cleaned and then, when remodeled, it is like new.

During July and August

This year we will make a specialty of Alterations and Repairs. Our system of measurement is such we can fit you as well by mail as by personal measurement. We have a large stock of new furs, all our own make, at very low price. Write to us.
