

DR. ALEXANDER J. McIVOR-TYNDALL

The interest which Dr. McIvor-Tyndall the celebrated English thought reader, writer and authority on the science of palmistry, is arousing by his wonderful interpretation of the lines of the hand, bids fair to become a fashion of permanent usefulness. "Half the failures in life," McIvor Tyndall declares, "are the result of misdirected effort. The hand tells exactly what the mind is best adapted for, and a thorough application of the truths of palmistry would avert many troubles and change for the better many an unsuccessful life."

"It is a curious fact," says McIvor-Tyndall's secretary, "that of the large number who daily call at the hotel to make appointments for a reading of the hand at least two-thirds are men." This is probably accounted for by the fact that men more readily recognize the personal benefits of the science, while women, as a rule, only take up the science because it is at present a society fad in the metropolitan cities of England and America.

McIvor-Tyndall's reception hours at the Lincoln are from 10 a. m. to 8 p. m.
